Appendix A

GROUP MEMBERSHIP

REDUCED MEMBERSHIP DUES
- 50% discount on SIU membership costs to all LUS members; current dues at USD $200 would be reduced to USD $100.
- Dues for all paying members will be collected by LUS and paid annually in one lump sum directly to the SIU Central Office.

REDUCED REGISTRATION FEES FOR CONGRESSES
- All members of LUS, who are members of the SIU, will be entitled to member rates for registration to the annual SIU Congress (savings up to 200€).
- Up to two officers of LUS will be entitled to complimentary registration to the annual SIU Congress.
- Up to two officers of LUS will be invited to attend the President’s Banquet at the annual SIU Congress.

ONLINE ACCESS TO THE WORLD JOURNAL OF UROLOGY
- Members will be entitled to online access to the World Journal of Urology, SIU’s official journal.
- Members who wish to receive a printed version of the journal can do so for a nominal annual fee.

ACCESS SIU ACADEMY
A powerful eLearning portal which houses a rich library of content for urologists and healthcare providers around the world.
- Members will be entitled to full content access on the SIU Academy for free.

ACCESS SIU@U
A simple, user-friendly virtual platform that offers online access to key plenaries, the Exhibit Hall, and additional bonus content from the Annual Congress.
- Members will be entitled to claim free CME credits by attending live on-line sessions during the annual SIU Congress.

SIU-LUS COLLABORATION
- The SIU will continue to develop its relationship with the LUS.
- The LUS will continue to promote SIU’s educational activities.
- The SIU/LUS will evaluate opportunities to organize a symposium during the SIU Congress.
Appendix B
SIU UROLOGY RESIDENT MEMBERSHIP

In order to connect with urology residents worldwide, the SIU Membership and International Relations Committee would like to present you with the opportunities that residents may benefit from when they become SIU members.

SIU MEMBERSHIP ACCESS
Trainee membership dues are waived so that residents may easily benefit from all that the SIU has to offer. Click here to access the Membership Application Form. To facilitate the Group Membership application process please contact the SIU Central Office.

SIU INNOVATORS
Engagement and promotion of early career urologists of the SIU is one of the SIU’s priorities. Young members are welcomed into the organization in order to take an active role in SIU Congresses, committees, SIU Academy, and for peer review of articles in the SIU journal, the World Journal of Urology. Trainees are also given the opportunities for academic growth, including the chance to present original work or deliver state-of-the-art presentations.

EDUCATIONAL ACTIVITIES
Trainees receive exclusive full content access to the SIU’s eLearning platform – SIU Academy, which features clinical case studies, educational videos, eSeries, eGrand Rounds, Bench to Bedsides (B2B), international endorsed events and more. Earn continuing medical education credits on selected courses by viewing live surgery broadcasts and congress webcasts.

PUBLICATIONS
Trainees can choose to sign up for an annual online subscription to SIU’s official monthly journal - the World Journal of Urology which is available for the nominal fee of $25 USD. This will provide access to the most recent joint SIU-ICUD (International Consultation on Urological Diseases) publications and a quarterly Newsletter.

SIU CONGRESS
Registration fees will be significantly reduced for the 38th Congress of the Société Internationale d’Urologie to be held from October 4-7, 2018 in beautiful Seoul, South Korea. This is a great opportunity to experience an excellent scientific programme in one of the most scenic cities in the world.

PHILANTHROPY
Trainees are given a unique occasion to contribute towards the development of ongoing SIU philanthropic activities such as training scholarships and fellowships for urologists from developing nations, SIU symposia and lectureships and support for young urologists to attend the SIU Congress.
Appendix C

EDUCATIONAL ACTIVITIES

**eGRAND ROUNDS**
Surgical eGrand rounds is a series of broadcasts from at least one hospital, and most often several hospitals from various geographical locations. These series aim to enhance medical knowledge, improve surgical skills and hone clinical reasoning skills for both trainees and urologists. Series will be carefully scheduled to avoid duplication of surgery type.

**CLINICAL CASE STUDIES**
Case studies are based on important clinical conditions that urologists manage on a day-to-day basis. Streamlined case presentations allow urologists to practice their skills, from assessment to treatment of a disease. The convenient format allows urologists to assess their knowledge and easily apply what they have learned to their own practice.

**EDUCATIONAL VIDEOS**
Educational videos permit urologists to view roundtable discussions, debates and interviews by leading worldwide experts. These programmes offer participants several medical perspectives from different key opinion leaders. Surgical techniques or the use of medical technology is also demonstrated through live surgery webcasts. If the urologist is unavailable to attend the live webcast, the videos are uploaded to SIU Academy for viewing at any time.

**eSERIES**
eSeries offer urologists the opportunity to watch presentations given by eminent speakers on a variety of important topics and hot issues in urology. Viewers also have the opportunity to post questions and discuss the content with other users using the “Ask the Forum” feature.

**ENDORSED EVENTS**
In collaboration with other urological societies, SIU hosts the live streaming of meetings or workshops focusing on specific urological topics via SIU Academy. The portal includes recorded videos from these SIU-endorsed events, as well as expert interviews to meet the broad educational needs of our geographically diverse membership.

**BENCH TO BEDSIDE (B2B)**
SIU proposes a unique program that will offer urologists an engaging way to learn translational research and how it applies in urology. The interaction of several disciplines is required to translate knowledge from bench to bedside. Therefore, this unique program will be based on a blended learning method in which traditional curricular elements are combined with non-traditional approaches. The main objective is to engage in a multidisciplinary approach to learning, in order to develop an understanding across disciplines.
Appendix D

uCARE

The Société Internationale d’Urologie (SIU) believes great innovations require strong collaboration, and that the best advancements happen through teamwork.

Over the course of the last year, the SIU has diligently been working on developing uCARE—a new platform for global clinical research in urology. This novel research platform includes four major components:

1. Clinical trial listings.
2. Leading research projects, including registries.
3. Publications that report results from the different research in the field of uro-oncology.
4. eHealth with the development of specific mobile app’s related to urological care.

Designed with partnerships in mind, the SIU has structured the governance of uCARE to include a Research Council, its function will be to lead and cooperate on large scale international research activities.

The council will be open to the societies that engage with SIU’s group membership activities, as this ensures proper representation from the respective societies and their country. You will find an illustration of the governance structure on page 2. Partners will be asked to nominate one member of their association to the uCARE Research Council. The candidate should be aware of their nomination, accept to be designated and agree to the conditions stipulated in this document. Furthermore, the candidate must be able to regularly attend council meetings (either in person or by web video conferencing), and should have the following qualifications:

- Experience in urological research, supported by their CV.
- Has been involved/worked with large datasets.
- Has the ability to coordinate research activities between the SIU and their Society or Association.
- Is able to attend the SIU Annual meeting (next meeting is October 4-7, 2018 in Seoul, South Korea).

The two research directors chairing uCARE will make a final decision about the candidate.

Following receipt of your proposal, a confirmation will be communicated to the nominee along with the next steps.
